

FOR A SAFER AND CONNECTED WORLD

# YOUR FUTURE WITH IPOQUE

Based in Leipzig since 2005 and part of the Rohde & Schwarz technology group since 2011, ipoque is an agile software company with a clear goal: develop tailored and state-of-the-art solutions for IP network analytics to make networks more secure and efficient. We stand for the highest quality. Detailed testing and clean-code standards are not just principles for us – they are our commitment.

Our products are innovative and unique. With our agile software development, we create solutions that deliver tangible value for a safer and connected world. For this, we leverage cutting-edge technologies and extensive technological expertise. At ipoque, tradition meets innovation creating an inspiring work environment where you can contribute your knowledge and continuously grow.

## WHAT WE OFFER:

A software development environment that gives you the freedom to realize your potential and tackle challenging tasks.

An open and friendly first-name culture with a strong team spirit – at ipoque, people and collaboration matter most.

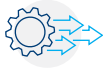

A modern and comprehensive tech stack designed for agility and scalability: cloud-native applications, containerization and virtualization (Docker, Kubernetes), sophisticated front-end frameworks (Angular & Lit), use of multiple programming languages (C, C++, Go, TypeScript, Java).

Flexible working hours that help you balance work and personal life in any situation.

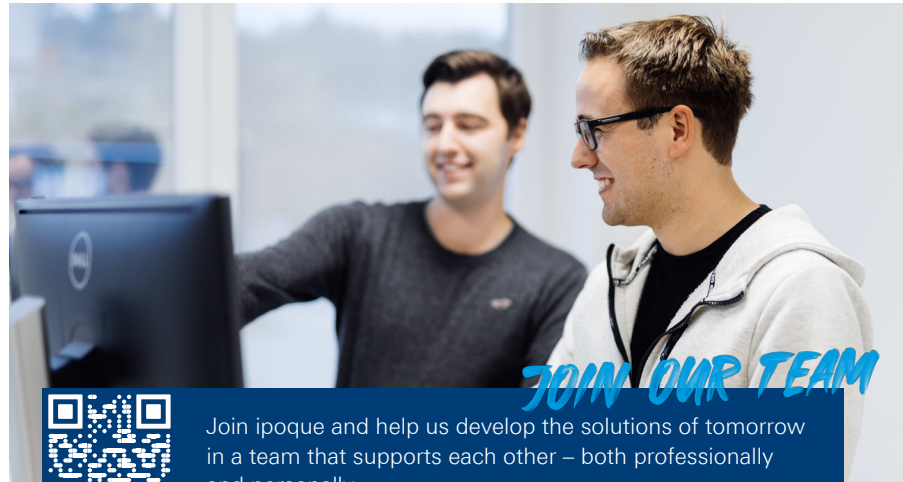

A flexible and high-performance development environment based on Linux.

An agile development approach based on SAFe, Scrum or Kanban, adapted specifically to the needs of our teams.

Offices in Leipzig and Haiger.

Join ipoque and help us develop the solutions of tomorrow in a team that supports each other – both professionally and personally.
